

Packages I maintain

updated 2026-10-05 · 127 packages · 9 ecosystems · 5 retired

AUR 17

PACKAGE	VERSION	SUMMARY
bless-cli	0.2.0-1	CLI logging helper for repeated runs with metadata tracking.
d-seams	2.0.1-1	Deferred structural elucidation analysis for molecular simulations.
eon	2.16.0-1	Algorithms for long timescales and PES exploration (EON).
flowy-code	1.0.0-1	Probabilistic lava emplacement simulator.
journey-cloud	5.2.3-1	Private diary, journal and companion (Journey Cloud).
klfc	1.5.7-7	Create advanced keyboard layouts in various formats.
pp-git	r198.2708b25-1	Text preprocessor designed for Pandoc (Markdown / reST).
python-anneal	0.5.0-1	Simulated annealing and quenching techniques for Python.
python-chemparseplot	1.9.8-1	Parsers and plotting tools for computational chemistry.
python-pychum	1.4.3-1	Input file generators for computational chemistry.
python-pytest-pep723	0.1.0-1	Pytest plugin verifying PEP 723 inline script metadata covers imports.
python-rgpycrumbs	1.9.20-1	Dispatcher-based analytical and computational suite for chemical physics.
python-wailord	0.2.0-1	Python library to interact with ORCA.
readcon-core	0.14.0-1	Oxidized CON file reader/writer with C ABI.
rtrash	0.1.4-2	Fast freedesktop.org trash tool with an rm-compatible interface.
tmetric-rpm	20.2.4-2	TMetric time tracker, packaged from the RPM to reduce breakage.
ttf-neuton	20260521-1	Neuton — clean, dark, Dutch-inspired serif font.

conda-forge 23

PACKAGE	VERSION	SUMMARY
eon	3.5.0	Algorithms for long timescales and PES exploration (EON).
rgpycrumbs	1.10.10	Dispatcher-based analytical and visualization suite for chemical physics.
pychum	1.4.3	Input file generators for computational chemistry.
anneal	0.9.0	Simulated annealing and quenching for Python.
pytest-pep723	0.1.0	Pytest plugin verifying PEP 723 inline script metadata covers imports.
chemparseplot	1.11.0	Chemical plotters and parsers.
sphinx-rustdoc-postprocess	0.1.0	Helper for including Rust sources into Sphinx docs.
pyflowy	0.0.1	Python bindings for flowy.
ira	2.2.0	Iterative Rotations Assignments (IRA) for molecular analysis.
probsamplers	0.1.2	Probability samplers for MCMC methods.
asv	0.6.6	Python benchmarking tool with web-based reporting.
asv_runner	0.3.1	Core Python benchmark code for ASV.
asv_bench_memray	0.1.2	Memray benchmark plugin for asv.
latex-rubber	1.6.1	Automated system for building LaTeX documents.
libmetatensor	0.2.5	Self-describing sparse tensor format for atomistic ML.
metatensor	0.2	Meta-package for the metatensor ecosystem.
python-metatensor-core	0.2.5	Python bindings for metatensor-core.
python-metatensor-torch	0.10.6	Python bindings for metatensor-torch.
python-metatensor-operations	0.5.0	Operations to manipulate metatensor data types.
python-metatensor-learn	0.6.2	Building blocks for atomistic ML models (PyTorch / NumPy).
libmetatensor-torch	0.10.6	TorchScript/C++ bindings to metatensor.
libmetatomic-torch	0.1.19	Atomistic ML models usable everywhere (C++ / Torch).
python-metatatomic-torch	0.1.19	Python bindings for metatomic-torch.

PACKAGE	VERSION	SUMMARY
rgpycrumbs	1.11.0	Dispatcher-based analytical and computational suite for chemical physics.
pychum	1.4.3	Input file generators for computational chemistry.
anneal	0.9.0	Various annealing and quenching techniques.
pytest-pep723	0.1.0	Pytest plugin to verify PEP 723 inline script metadata covers all imports.
chemparseplot	1.11.0	Parsers and plotting tools for computational chemistry.
sphinx-rustdoc-postprocess	0.1.1	Post-process sphinxcontrib-rust RST (markdown leftovers via pandoc).
wailord	0.2.0	Python library to interact with ORCA.
pydseamslib	2.9.1	Python bindings for seams-core.
pyrsx	0.2.10	Python bindings for rsx, a RAD-seq sex-determination toolkit.
asv	0.6.6	Airspeed Velocity: Python history benchmarking with web reports.
asv-runner	0.3.1	Core Python benchmark code for ASV.
asv_bench_memray	0.1.2	Memray benchmark plugin for asv.

crates.io 45

PACKAGE	VERSION	SUMMARY
anneal-core	0.9.0	Simulated annealing components built on eindir typed primitives.
bless	0.4.0	CLI logging helper for repeated runs with metadata tracking.
claimdag	0.6.2	CAS claim and complete on a DAG.
claimdag-cli	0.6.2	Command line over a claimdag work.bin directory.
claimdag-mcp	0.6.2	MCP server over a claim graph, who holds a claim, and the lease on it.
claimdag-tui	0.6.2	Terminal work graph over a claimdag work.bin.
dlpk	0.4.1	DLPack integration for Rust.
deedar	0.3.3	One-writer deed store and Cap'n Proto client.
deedar-cli	0.3.3	Operator commands for creating, reading, and tracing deeds.
deedar-deed	0.3.3	A unit of named work, with its kind, trail, and accession.
deedar-mcp	0.3.3	MCP server over a deed store and what a unit of work produced.
eb_stack	0.3.0	Resolvo-solved variants and CycloneDX SBOMs from conda-forge, Spack, and EasyBuild recipes.
eindir-core	0.6.0	Typed primitives for ND objective functions and bounded sampling.
gauss-jacobi-quad	0.2.0	Rust bindings for GaussJacobiQuad (Fortran via C ABI).
linkcell	0.3.8	Periodic linked-cell cutoff pairs and k-nearest neighbour search.
ljos	0.24.3	Persistent memory, a work tracker, and a shell-command gate over MCP and hooks.
ljos-consensus	0.6.0	DeGroot and Friedkin-Johnsen updates over a trust graph.
ljos-hud	0.22.0	Summonable pane over due reviews, live claims, and trust.
ljos-mcp	0.14.0	MCP server for ljós.
ljos-policyd	0.2.5	Argv checks for the Leidarljós seat.
minimage	0.1.3	Minimum-image convention for periodic parallelepiped cells.
ookcite-mcp	0.6.5	MCP server for OokCite citation validation and formatting.
packset	0.11.0	Standing memory for claims written on purpose.
packset-client	0.11.0	HTTP client for the packset daemon.
packset-core	0.11.0	Atom schema, fuse and diversify, decay, and extract filters.
packset-daemon	0.9.21	Loopback pack writer, one process for every client.
packset-embed	0.11.0	Dense projection from text to vectors.
packset-mcp	0.9.21	MCP server over a pack and the claims it cites.
radsex-core	0.2.3	Core library for RADSex sex-determination analysis.
readcon-core	0.16.1	Oxidized CON file reader/writer with FFI for C/C++.
readcon-db	0.1.6	Mmap-backed CON frame corpus (Heed/LMDB) with multi-language FFI.
rgmin	0.3.0	Local first-order minimization over eindir differentiable objectives.
rgpot-core	3.4.0	Core Rust library for rgpot RPC potential energy surfaces.
rgsaddle	0.2.0	Band and minimum-mode saddle mechanics over rgmin steppers.
rsx-cli	0.2.5	CLI for RAD-seq sex-determination marker analysis.
rsxcore	0.2.5	Rust library for RAD-seq sex-determination marker analysis.

PACKAGE	VERSION	SUMMARY
rtrash	0.1.4	Fast freedesktop.org trash tool with an rm-compatible interface.
snapper-fmt	0.11.9	Semantic line-break formatter for Org, LaTeX, Markdown, plaintext.
vissue-cli	0.20.0	Command line over per-project orgmode tracker files.
vissue-control	0.20.0	JSON-RPC control wire for the tracker Unix socket.
vissue-core	0.20.0	Model, store, queries, and org parser for the tracker.
vissue-hud	0.20.0	Summonable icedtea task board; home is the project list.
vissue-mcp	0.20.0	MCP server exposing orgmode tracker files to agents.
vissue-serve	0.20.0	Unix-socket control owner (bind, detach, handshake).
vissue-tui	0.20.0	Terminal board over ready, claims, agenda, and search.

Spack 18

PACKAGE	VERSION	SUMMARY
py-vesin	–	Neighbor lists for atomistic systems.
py-wigners	–	Wigner 3j and Clebsch–Gordan coefficients.
py-sphericart	–	Efficient spherical harmonics.
py-sphericart-torch	–	Spherical harmonics in Cartesian coordinates (Torch).
libmetatensor	–	Self-describing sparse tensor format for atomistic ML (C API).
libmetatensor-torch	–	TorchScript/C++ bindings to metatensor.
libmetatomic-torch	–	Atomistic ML models for use across engines (C++ / Torch).
py-metatensor-core	–	Python bindings for metatensor-core.
py-metatensor-torch	–	TorchScript bindings for metatensor.
py-metatensor-operations	–	Operations on metatensor data types.
py-metatensor-learn	–	Building blocks for atomistic ML models (PyTorch / NumPy).
py-metatomic-torch	–	TorchScript bindings for metatomic.
py-metatrain	–	Train and fine-tune atomistic ML models.
py-torch-spex	–	Spherical expansions of atomic neighbourhoods.
py-pytest-datadir	–	pytest plugin for test data directories and files.
symengine	–	Fast symbolic manipulation library (C++).
eigen	–	C++ template library for linear algebra.
dftbplus	–	DFTB+ density-functional tight-binding package.

MELPA 1

PACKAGE	VERSION	SUMMARY
lammps-mode	–	Emacs major mode for LAMMPS input files.

Containers 9

PACKAGE	VERSION	SUMMARY
haozeke/vpn-proxyjump	1469 pulls	SSH proxyjump / VPN helper image. Last push 2026-03-30.
haozeke/zenyoda_archlinux	682 pulls	Arch Linux with user, git, sudo, pandoc, yarn, pip, TeX. Last push 2018-02-15.
haozeke/php_zip_alpine	648 pulls	Alpine PHP zip for linking to nginx. Last push 2018-07-22.
haozeke/docker_nginx_amplify_alpine	331 pulls	Alpine nginx Amplify / organizr setup. Last push 2018-01-02.
haozeke/crdroid	257 pulls	Image for building crDroid ROMs. Last push 2018-10-12.
haozeke/kobobot	185 pulls	Ubuntu image for building KOReader and Plato. Last push 2018-06-04.
haozeke/platobuilder	183 pulls	Immutable builder for Plato with fixed dependencies. Last push 2018-06-04.
haozeke/docker_docuyodabot	0 pulls	Pandoc / docuYoda report build system. Last push 2018-07-22.
ghcr.io/haozeke/vpn-proxyjump	–	vpn-proxyjump container on GitHub Container Registry.

CRAN 1

PACKAGE	VERSION	SUMMARY
fastMatMR	1.2.8	High-performance Matrix Market file I/O for R.

PACKAGE	VERSION	SUMMARY
fastMatMR	1.2.8	High-performance Matrix Market file I/O (peer-reviewed).

Retired 5

nixpkgs 5

Still listed on nixos-25.11; cleared on unstable.

PACKAGE	TOUCHED	SUMMARY
conan	2.21.0	C/C++ package manager.
d-SEAMS	1.0.1	MD trajectory structure analysis.
rang	3.2	Header-only C++ terminal colors.
python3Packages.patch-ng	1.18.1	Apply unified diffs (Conan stack).
minuet	2023	KDE music education app.
