

Search and merge with git filtered repositories

Rohit Goswami · 2025-09-04 · git · cmdline

Since the commit hashes are altered, checking old pull requests for commits to cherry pick will not work. However the new start and end hashes can be found with:

```
git rev-parse --short :/"header or other commit message text"
```

Followed by the standard:

```
git cherry-pick $SHA_START^..$SHA_END
```
