

Hyread Color E-Ink adb rules

Rohit Goswami · 2024-08-26 · adb · ereaders

A quick glance at the output of `lsusb` yields:

```
Bus 003 Device 004: ID 04f2:b751 Chicony Electronics Co., Ltd Integrated Camera
```

Which suggests the following rule:

```
cat /etc/udev/rules.d/51-android.rules
SUBSYSTEM=="usb", ATTR{idVendor}=="04f2", MODE="0660", GROUP="adbusers", TAG+="uaccess"
SUBSYSTEM=="usb", ATTR{idVendor}=="04f2", ATTR{idProduct}=="b751", SYMLINK+="android_adb"
SUBSYSTEM=="usb", ATTR{idVendor}=="04f2", ATTR{idProduct}=="b751", SYMLINK+="android_fastboot"
```

With these forcibly loaded via `sudo udevadm trigger`, the device should show up with `adb devices`.
