

Nix Shell and Locales

Rohit Goswami · 2023-07-26 · nix

From [here](#). Often `nix-shell` invocations have the following issue:

```
bash: warning: setlocale: LC_ALL: cannot change locale (en_US.UTF-8)
```

The fix is in two parts:

```
# Install glibc
nix-env -i glibc-locales
```

Then use it in the `shellHook` as:

```
shellHook = ''
  # Locale
  export LOCALE_ARCHIVE=${pkgs.glibcLocales}/lib/locale/locale-archive
'';
```

Or directly as `export LOCALE_ARCHIVE="$(nix-env --installed --no-name --out-path --query glibc-locales)/lib/locale/locale-archive"`
